

DATE:

Dear Customer:

At PECO, we are committed to providing safe and reliable energy for our customers and the communities we serve. As part of our work, we will be upgrading and installing new equipment to enhance the local electric distribution system in your area.

Our community is operating under a heightened sense of uncertainty during this COVID-19 pandemic. Your priority is to stay safe and maintain a sense of normalcy. You can be assured that the men and women of PECO are working around the clock to ensure we continue to keep the lights on and the gas flowing for the communities we serve. We are considered an essential business during this pandemic and the work our crews are performing is critical to ensure the continued safe and reliable service that you need every day, especially during these times.

About the project:

- More than \$1,300,000 will be invested to enhance the local electric distribution system for you and your neighbors.
- Approximately 1.3 miles of underground cable and conduit will be replaced.
- Work will also include new manholes, transformers and equipment as needed.
- The majority of this work will occur on area sidewalks and streets. Most of the work will occur along; Chestnut St, Church St, Darlington St, Gay St, High St, Market St, New St and Prescott Alley.
- Communication was sent in June 2020 stating the project would start in June 2020, however, the work was delayed with COVID-19 and other unforeseen circumstances and will start the week of January 18th. The project is expected to be completed by May 2021.
- Work will occur from 7 a.m. to 5 p.m., Monday through Friday.
- The work will be performed by a qualified PECO contractor.

Crews may need to temporarily interrupt service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned interruptions. We will work closely with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal, student transportation and emergency vehicles will be maintained during construction.

We are dedicated to keeping you informed about our work, listening to your input and modifying plans based on your feedback when possible. If you have any questions about this work during construction, please contact Mike Herman by email at michael.herman@exeloncorp.com.

Sincerely,

James Garvey,
Director, Regional Electric Operations, PECO
